WFA HiFlow for Harsh Water Inline Water Filter System

K-T-HWHIFLOW

New technology sediment and carbon filtration provides superior chlorine, bad taste, odour and particulate reduction. Inhibits limescale build-up in water-using appliances.

Certified to remove/reduce contaminants including: Sediment, Chlorine, Bad Taste and Odours, providing superior filtration for harsh water areas. This filter does not remove fluoride and healthy natural minerals and salts.

Incorporates proprietary filter head technology whilst still warranted to fit and compatible with all existing HiFlow installations.

Ten year warranty.

Tested to exceed 3,500 kPa burst pressure.

Connects to any tap. Vertical or horizontal installation.

Replacement Cartridge: C-T-HWHIFLOW
